## Advanced Fixed Applications

### Expanding Mini Dental Implant Treatment Options

Advanced Courses from the first and most experienced small diameter implant restorative team

## Advanced Fixed Applications Expanding Mini Dental Implant Treatment Options

### COURSE OBJECTIVES . . .

To help clinicians offer a full range of options to their patients, and grow their practice with fixed Mini Dental Implant restorations. With completion of this 14CE seminar opportunity you'll learn:

- **Advanced placement** and protocols using small diameter implants.
- Use of **fixed prosthetics** on small diameter implants including single tooth, bridge, and roundhouse applications.
- **Considerations of bone quality** and density when placing small diameter implants.
- CT evaluation simplified - **Basics of CBCT**, case planning advantages & software use.
- **Lab protocols** and communications for fixed applications.
- Introduction into conventional implantology - placement, restorative, when do they become the **best choice?**

**"If you really want to know Mini Dental Implant use and placement in detail, from both the clinical and laboratory perspective, this is *the* course for you. Great job!" - Dr. Ralph Parkin, DMD**

**"A perfect follow-up to expand what I learned at the basic course. Well organized and hosted, and information packed. Superb. Thank you!" - Dr. Craig Spieker, DDS**

### ABOUT OUR FACULTY . . .

#### **Dr. Benjamin Oppenheimer**

is a graduate of the University of Buffalo School of Dental Medicine. With years of MDI experience and over 2000 MDI cases covering all aspects of treatments, Dr Ben has been a lead speaker for progressive companies such as Imtec a 3M company and FIRST Labs. His knowledge of implant hardware, CBCT, bone grafting materials, and minimally invasive implant dentistry have opened doors for hundreds of dentists across the nation.

#### **Dr. Joseph Gillespie**

is a graduate of the University of Oklahoma School of Dentistry. A former president of the International Academy of MDI and opinion leader for Imtec a 3M company, Dr Joe has lectured extensively on Mini Dental Implant based, minimally invasive restorative options. He is a fellow of the Academy of Implant Dentists and a delegate for the Coastal District of South Carolina Dental Association.

#### **Mr. Andrew Jakson**

With over 20 years experience as a technician and lab owner, Andy has applied his background to continuous improvement and development of the MDI industry. Teamed with Imtec a 3M company, he was instrumental in the development of implant hardware, tools and technology that have helped shape the industry. This experience has allowed Andy to process over 20,000 MDI cases through his labs and develop MDI restorative protocol next to none.

### WHY SHOULD I CHOOSE THE ADVANCED FIXED APPLICATIONS COURSE?

You have many choices when selecting your next course, but only Advanced Fixed Applications lets you build off basic introduction seminars and gives you:

- **Opportunity to learn new techniques from pioneers in the industry.**  
Our faculty has been actively engaged in the creation and performance of Mini based restorations and procedures longer than most in the industry, with high success rates and tens of thousands of happy patients. Let us show you how.
- **Smaller class size to encourage class participation and full coverage of questions presented.**  
You pay good money for your training, shouldn't you take away a full understanding to help you make that money back? Our class size of typically 15-20 participants makes sure you get personal attention and one-on-one time with our instructors to get those important questions answered.
- **Technical support after the course to increase your confidence and perfect your Mini Implant skills.**

The techniques presented will give you confidence adding new skills to your toolbox but we believe your success is our success that's why we'll be with you after the course to with clinical and lab contacts to guide you through your newly learned protocols.
